

Urban Mansions & Apartments

Apartment Marceau *Paris*

Based on the French Riviera, Caprini & Pellerin Architectes is specialized in architecture and design for high-end residential and commercial projects.

The practice was founded in 2008 by Kevin Caprini & Jerry Pellerin. The duo leads an international team of over twenty architects and designers. They provide a full range of services ranging from conceptual ideas to the implementation of architecture, interiors, landscaping, furniture design, antiques and art buying. Caprini & Pellerin deliver a warm and timeless vision of luxury, achieved through acute attention to detail, craftsmanship, high-quality materials and close collaboration with each client.

Located near the prestigious Avenue George V of Paris, the Apartment Marceau welcomed a collection of incredible artworks after its contemporary refurbishment for an art collector.

In addition to an array of selected art, the architects commissioned famous street artist Mehdi Cibille, alias Le Module de Zeer, to honor the apartment and create in situ artwork in the foyer and the guest bathroom.

In the foyer, the art piece is a backlit cut out Corian structure that reveals itself once lit. The artist also graffitied his drawings on the red wall of the guest restroom. In regard to the main rooms, the apartment comprises four en-suite bedrooms, a lounge and a kitchen.

The architects designed a series of white Corian curved walls and played with depth and extensions for the ceiling, all of which stretch out and shape most of the apartment and hide the technical elements and storage.

These organic walls create an illusion of volume and add character to the space which unifies the contrast between cold and warm materials.

The result of this refurbishment is an intimate organic space in synch with the owner's lifestyle.
